REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: applicant's arguments filed 12/22/2005 are persuasive in view of the amended claims. The claims have been carefully considered and the fluid mechanics required of the blocking member of the burner 1 will have to be carefully combined with the flow profile of the burner wall (e.g. where the element number 1 is drawn to in the instant application) and other factors to create the local fuel rich region. Hence, it is not inherent that Becker 6,152,724 will identically produce the same local fuel rich region as the configuration of its wall 3 is not identical to that of the instant application. The fluid mechanics required to create a local fuel rich region are not tied to just the velocity profile but also the time for mixing and the structure of the blocking member and the even the interface of the burner 1 with the combustion chamber 22. Hence, upon further consideration, applicant's claims are distinguished over the art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
